

EXCELLENCE IN FIXED COMBINATIONS™

unigel

SIMPLIFYING TREATMENTS THROUGH
INNOVATIVE SOLUTIONS

A fixed-dose combination therapy as an approach to reduce the burden of certain chronic diseases, allowing patients to achieve adherence to different treatments versus those received conventionally (Taking drugs separately)

This is Unigel™

Combines different ingredients in a single capsule, avoiding physico-chemical incompatibilities and maintaining the biopharmaceutical and pharmacokinetic properties of each component. **Healthier patients lead to a healthier planet.** Unigel™ unleashes the

potential of environmental benefits of innovative fixed dose combinations in softgels, making it possible to create a single product by using different pharmaceutical forms in just one package.

**UNIGEL™
IS THE ONLY
FIXED-DOSE
COMBINATION
IN THE MARKET
THAT INCLUDES
A SOFTGEL
CAPSULE.**

By consuming **Unigel™** products, patients avoided the production and disposition of

27.5 million blister packs in 2022,

according to our estimations. Besides plastic demand reduction, **Unigel™** also **deploys different environmental benefits across the supply chain by merging multiple compounds in a single product**, reducing the demand for other packaging materials, such as cardboard, paper, and aluminum foil.

Opportunities

Different release profiles available

Diverse portfolio/Enables brand differentiation

Permits the combination of API's that are normally not compatible

Combines multi-purpose ingredients in one form

Improves Patient convenience and compliance

Clear look inside the capsule

Different gelatin formulations, suitable for vegetarian/vegan diets.
